Summary

Result oriented, deeply hands-on seasoned professional. Proficient in Python Programming, Data Structures and SQL. Expertise in feature development and problem solving. Accomplished software architect with proven ability to develop and maintain software applications.

Skills and Expertise

- Extreme Passion for Python Programming, Multi-Threaded, Object Oriented Design & Development Projects.
- Frontend Designing using HTML5, CSS3, and Javascript.
- Expert in Algorithms and Problem Solving. Language used primarily Python.
- Tools used –Visual Studio, Jupiter Notebook, Github,etc.
- Operating System: Windows, Linux

Experience

Internship Machine Learning   Jan 2024

Navodita Infortech - Online
- Led various technical challenges to execute NLP.
- Led the team for creating plans and implementing on Jupiter Notebook.
- Led multiple initiatives to integrate multiplePython libraries, Machine Learning Algorithms, migrate the source code version control, from Anaconda to Github.

Internship Data Science   Jan 2024

CodSoft - Online
- Led various technical challenges to Analysis of Data.
- For data retrieving, using Kaggle.
- Led multiple initiatives to integrate multiplePython libraries, Machine Learning Algorithms, migrate the source code version control, from Anaconda to Github.
- Led the team for creating plans and implementing on Jupiter Notebook.

Project

Frontend Designing – Portfolio
Web Application using Django and Python - E-commerce Website .
Machine Learning - Text Classification using NLP
Data Science
- IRIS Flower Classification, learned to train our own supervised machine learning Model.
- Credit Card Fraud Detection Model

Education

MCA (Computer Application, Score- 81.46%) Babasaheb Bhimrao Ambedkar Bihar University, Muzaffarpur	**2021 - 2024**
BCA (Computer Application, Score- 77.00%) MSKB College, BRABU Muzaffarpur	**2017 - 2020**

Technical Skills

SaaS/AWS technologies, Service operations, Agile development, Software architecture and design.
